HOW TO SELL PROWLER™

Here are a few tips on how to explain the benefits of using PROWLER when talking to customers:

NEW FLAVOR TECHNOLOGY:

PROWLER bait formulas contain unique inert ingredients, which are tested and proven to increase bait efficacy

ACUTE ACTIVE INGREDIENT:

PROWLER is made with Bromethalin, a non-anticoagulant active that disrupts energy production. Rats and mice usually consume a lethal dose in a single night's feeding.

EFFICIENT BAITING:

Norway rats, roof rats and house mice typically feed less or cease feeding altogether after consuming a lethal dose. This leaves more bait available over a longer period of time.

MORE CHUNX PER PAIL:

PROWLER Bait Chunx are 15gm weight, compared to a standard 28gm size, so there are more placements in a 4lb pail

NEW SOFT BAIT:

Palatable, oil-based formula preferred by rodents even when other food sources are available
