- For Use In and Around Homes and Buildings

FIRST AID
HAVE LABEL WHEN OBTAINING TREATMENT ADVICE

If Swallowed:

- Call a poison control center, doctor, or 1-877-464-4384 immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

If on Skin:

- Wash with plenty of clean water.

NOTE TO PHYSICIAN
If swallowed, this material may cause the drying and irritation of the blood and cause bleeding of organs, especially the brain, if untreated. If in contact, repeat as necessary based on monitoring of proboscis tissue.

TREATMENT FOR PET POISONING
If an animal eats this bait, call a veterinarian at 1-877-464-4384 at once.

NOTE TO VETERINARIAN
Anticoagulant: Diphacinone. For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K₁.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals
CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals and pets. Do not get in eyes or on clothing or bedding.
All handlers (including applicators) must wear long pants, shoes, socks, and waterproof gloves. Use caution when removing containers or unused bait. Minimize application of the product near water.

Use Safety Requirements
Follow manufacturer's instructions for decontaminating PPE. If so such instructions for washable acid, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothes.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to mammals, birds and other wildlife. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsate.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with labeling.
READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for rats, mice, and meadow voles described on this label.
IMPORTANT: Do not expose children, pets, or nontarget animals to rodenticides. To help to prevent exposure:
1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be stolen from bait stations when they are closed, units must be secured or otherwise immobilized. Storage bait stations are needed in areas open to hordes of rodents, raccoons, bears, or other potential destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled, or uncontaminated bait as described on this label.

SELECTION OF TREATMENT AREAS: Determine areas where rats, mice or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by grouted openings, corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:
Each TOMCAT® All-Weather Rodent Block consists of a 4-ounce bait scored to be broken into sixteen 1-oz pieces.
Rats: Shake and apply to 1/2 pieces of bait per placement (usually at intervals of 15 to 30 feet) per placement. Maintain a constant supply of fresh bait for 10 days or until signs of rat activity cease.
Mice and Meadow Voles: Use one 1-oz piece per bait placement. Space placements at 10 to 12 foot intervals. Two 1-oz pieces may be needed at points of very high activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse or meadow vole activity cease.

FOLLOW-UP:
Reduce contamination or spoiled bait immediately. Wearing waterproof gloves, collect and properly dispose of all unused bait and leftover bait. To discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and inspection bait as needed.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.
Pesticide Disposal: Wastes resulting from the use of this product may be placed in household or commercial waste disposal facilities.
Container Handling: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash, or as approved directed facility or by incineration.
WARNING: This is the most consistent with applicable law, which makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label directions.

Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.
