

## LIQUID CONCENTRATE

**CONCENTRATE FOR  
PREPARING LIQUID BAIT  
TO KILL NORWAY RATS,  
ROOF RATS AND HOUSE MICE**

*TOMCAT Liquid Concentrate contains sodium salt of the multiple feed active ingredient Diphacinone. Even when rodents have an available food source, they still drink water, so TOMCAT Liquid Concentrate is an excellent way to supplement a rodent control program especially in hot, dry conditions.*

- Each pouch of Tomcat Liquid Concentrate mixes with one quart of water
- Ideal for hot, dry conditions or areas where food is readily available but water is limited
- Even when rodents have a food source other than bait, rats need water daily and mice will drink when it is available
- Mixed product can be placed in a chicken feeder or any container where rodents will seek out a water source
- Available in 8pk boxes for retail or 50ct Bulk
